

TUTORING MACHINES

SAT Prep Online Video Course Syllabus

Our syllabus is a comprehensive account of the materials that will be covered in this course. Please be aware that we do not recommend that students follow a top-down approach to watching the videos. Instead, our syllabus is designed to go through the video chapters in a specific order. You will cover enough material to progressively take diagnostic tests as you progress through this course.

It is highly recommended to follow the syllabus for maximum score improvement. Try not to allow too much time to elapse between video lessons and homework. Doing at least 2 days of video lectures per week is generally a good pace to follow.

This video course will rely on practice tests provided directly from The College Board. If you want additional practice you can purchase The College Board SAT book: *Official SAT Study Guide 2020 Edition*. [You can purchase this book directly from Amazon here.](#) You will be able log into testprep.tutoringmachines.com to score and receive a detailed score reports for all the tests in this book, as well as other SAT tests administered in the past.

Since the pandemic, the SAT essay has lost popularity. Therefore, there will be no need to do an essay with taking a practice test.
